3-Day - BCM Specialist Workshop covering the ISO 22301

Course description:

The 3 Day Workshop Covering the BCM-PDCA Cycle with **the Business Continuity Management Specialist** is a specifically developed BCM workshop which has been designed to provide a complete learning experience for professionals. The workshop helps the participants to understand the BCM framework, the terminology and the BC Planning Methodology. It also helps to understand the difference between BCM, Disaster Recovery, Crisis Management and Emergency Response.

The workshop also helps the participants to understand the benefits of implementing a Business Continuity Management System (BCMS) based on ISO 22301 best practices standard. The ISO 22301 standard ensures identification and management of potential business disruptions; thereby enabling the organization to continue to live up to customer expectations. The training is a combination of classroom lectures, discussions, simulation exercise, videos and a role play. This workshop offers a high-paced, structured, eye-opening and comprehensive learning experience.

The strength of the workshop is that it goes with the principles of BS 25999 (which is still available for use) and also deals with those from ISO 22301 (the new international standard for Business Continuity Management).

Learning Objectives:

- Gain appreciation of the criticality of BCM, and its key drivers
- Understand the critical steps involved in creating a Business Continuity Plan, such as Risk Analysis, Business Impact Analysis, Recovery Strategy and Plan Development
- Understand how the internationally acclaimed BS 25999 and ISO 22301 provide a basis for understanding, developing and implementing business continuity within an organization
- Effectively manage crisis communications with external and internal entities, and the public
- Familiarize and prepare staff to react quickly and decisively
- Minimizing risk to your company and resources when disaster strikes

Who should attend:

- BCM Heads, Coordinators, Program/ Project Managers
- Full-time or part-time Business Continuity Professionals and Consultants
- Auditors wanting to gain an in-depth understanding of BCM
- Senior Management who may comprise the Crisis Management Team of the organization, responsible for managing the situation at a Leadership level
- Members of the BCM Team, department BCM coordinators, recovery and support team
- IT and Information Security professionals
- Business owners/ managers who want to safeguard their investment from losses caused by disruptions
