5 Day Lead Auditor Course on Information Security Management System (ISMS) based on ISO 27001:2022

Course description:

With the help of a number of hands-on team/individual exercises, role plays and a case study, this 5-day instructorled ISO 27001 Lead Auditor Training Programme enables participants to gain an in-depth and practical understanding of the ISO 27001:2022 audit requirements. There is particular focus on audit management and consistent report writing and the conduct of all key stages of a real life ISMS (Information Security Management System). Interactive discussions, videos, quizzes, refreshers and continuous assessment techniques are employed to ensure ongoing participant involvement and accelerated learning.

A certificate of successful completion of the course will be issued to those participants who complete the continuous assessment and written examination. Participants who do not qualify in the continuous assessment or the written examination will be given a certificate of attendance only. Training methodologies include videos, classroom lectures and discussions on the audit process, and also individual/group exercises based on a case study/roleplays.

Information Security Management System Standard ISO 27001:2022 aims at customer satisfaction through systematic process approach through PDCA model.
