

## Certified ISO 14001 Lead Auditor

---

### COURSE DESCRIPTION

The EMS Lead Auditor Course for ISO 14001:2015 provides an essential foundation of knowledge and a hands-on understanding of environmental management systems (EMS). Participants in the course are introduced to the principles, requirements, processes, tools, and techniques related to conducting lead audits on organizational compliance with this internationally recognized standard. Through lectures, interactive discussions, and exercises as well as case scenarios, students become prepared to demonstrate professional auditing competence required by international standards organizations to meet applicable certification criteria. Upon successfully completing this EMS Training Audit Program participants will be accredited fully compliant professionals – able to conduct sustained integral audits of Environmental Management Systems that adhere closely to key elements set out in ISO 14001: 2015.

### COURSE CONTENT:

- The requirements of the ISO 14001:2015 Standard for auditing, the ISO 14000 standards series, and the auditing process approach, including the PDCA Cycle;
- Auditing the documentation for environmental management systems and the requirements of ISO 19011;
- Auditor Responsibilities and Auditing Roles;
- Checklists, non-conformance reports, audit reporting, final team meeting, and follow-up are all components of audit planning.
- Exercises, case studies, and records of verification and audit.
- Auditor registration, accreditation, and certification; course examination
