

CONTINUITY & RESILIENCE

## Certified ISO 45001 Lead Auditor Course

### Course description:

This Occupational Health & Safety Management Systems (ISO 45001:2018) Lead Auditor Course provides in-depth instruction and practice for the successful completion of an ISO 45001 lead auditor certification program. The course curriculum covers all aspects and processes related to implementing a comprehensive management system, including the extent of conformance, the roles, and responsibilities of various departments involved in establishing such systems, international requirements for compliance purposes, etc. Participants will gain an understanding of risk management techniques; internal auditing procedures; corrective action strategies; identification and evaluation of areas exposed to occupational health risks plus parameters used to control them as well as legal issues associated with this form or audit process/standard. By taking part in both practical exercises offered during the class timeframe as well as mock audits after it has been completed attendees should be able to reach a heightened level of confidence when undertaking actual assessments within their professional roles upon finishing the course successfully.

### COURSE CONTENT:

- Introduction to Occupational Health & Safety and OHSMS
- Requirements of ISO 45001
- Overview of Occupational health and safety issues
- Overview of OHSMS Strategies
- Overview of OHSMS audit reporting, audit performance, and audit management
- Practical exercises, workshops, case studies, role plays and feedback.

### OBJECTIVE -

- Understand the requirements of ISO 45001:2018 and its application in occupational health & safety management systems
- Learn how to plan and conduct an audit according to the principles of ISO 19011.
- Understand the principles of auditing, the audit process and the roles and responsibilities of auditors
- Learn how to interpret the requirements of ISO 45001:2018 and to use auditing techniques to evaluate the OHSMS
- Understand the importance of continual improvement and how to use audit results to identify opportunities for improvement
- Develop skills in using auditing techniques such as interviewing, observation, sampling, data gathering, and analysis
- Become familiar with the role of a lead auditor in making objective decisions on findings
- Acquire knowledge of report writing for audit results.

### Who should attend?

Anyone who wants to become a certified lead auditor or auditor and conduct internal and external audits of OHSMS should take this course.
